Construction Phase							
acket Installation							
opsides Construction							
Annex B Date: Jan 2021	Construction	Programme for	FEP-01/558/2	018/A		Environmental Resources Management	ERM

Schedule of the works associated with the subsea gas p	ipeline for Lamma	a Power Station (LPS) and the associated	I Gas Receiving S	tation (GRS) in LPS	
WORK	Q3 2020	Q4 2020	Q1 2021	Q2 2021	Q3 2021	Q4 2021
reparation Phase			-			
e-survey						
emoval of obstructions						
onstruction Phase	1					
e-trenching including Deployment of Silt Curtain and Pilot Test						
e-burial of pre-installed pipeline by Mass Flow Excavator						
peline Laying						
ermediate Hydrotesting for Pipeline						
ost-trenching including Deployment of Silt Curtain and Pilot Test						
ock Armour Placement						
nal Hydrotesting for Pipeline						
as Receiving Station (GRS) including pipe rack construction, preparation works at the ent header for tie-in of the new GRS, fencing, new gas receiving facility and new pipeline prinection, and pre-commissioning, commissioning and start up						
int ests on the efficiency of silt curtain system shall be conducted during the early stage of constructi	ion to confirm the remo	val efficiency of the silt curt	ains.			
Annex B Construction Prog	Construction Programme for FEP-02/558/2018/A			Environmental		
DATE: MAR 2021					Resources Management	ERM

Schedule of the works associated with the	subsea gas pipelir	ne for Black Point	Power Station (BPI	PS) and the associat	ted Gas Receiving St	ation (GRS) in F	3PPS	
WORK	Q3 2020	Q4 2020	Q1 2021	Q2 2021	Q3 2021	Q4 2021	Q1 2022	Q2 2022
Preparation Phase								
Pre-survey								
Removal of obstructions								
Construction Phase							·	
Pre-trenching including Deployment of Silt Curtain and Pilot Test								
Cofferdam and Sheet Pile Construction								
Pipeline Laying								
Post-trenching including Deployment of Silt Curtain and Pilot Test								
Rock Armour Placement								
Intermediate and Final Hydrotesting for Pipeline								
Gas Receiving Station (GRS) including pipe rack construction, preparation works at the vent header for tie-in of the new GRS, fencing, new gas receiving facility and new pipeline connection, and pre-commissioning, commissioning and start up								
Remarks: Pilot tests on the efficiency of silt curtain system shall be conducted during the early stage of constructi	on to confirm the remova	al efficiency of the silt cu	tains.
